

**STICKY**®

## Full Stack Developer (NL, Utrecht)

*STICKY STUDIOS is a leading development studio dedicated to delivering immersive, top-quality mobile, VR and AR experiences. Our entertainment-, branded- and applied games are deployed cross-platform and cross-channel. The past 11 years Sticky Studios produced more than 65 games with over 250mm cumulative app downloads.*

We are looking for a Front-End Web Developer who is motivated to combine the art of design with the art of programming. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. You will work with the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

### Responsibilities

- develop the control panel frontend for our game services;
- co-develop server backend frameworks for our game services;
- develop and deploy new tools to improve workflow when necessary;
- collaborate with engineers, designers and producers to ensure consistent product vision;
- troubleshoot, test and maintain our core products to ensure optimization and functionality;

### Technical knowledge

- excellent understanding of web markup and semantics, including HTML5, CSS3.
- excellent understanding of client-side scripting frameworks, including jQuery and Bootstrap.
- proficient understanding of cross-browser compatibility issues and ways to work around them.
- good understanding of asynchronous request handling, partial page updates, and AJAX
- excellent knowledge of PHP 5 and 7 and its environment (PHP coding standards, Composer);
- knowledge of back-end frameworks such as Laravel and experience in SQL databases;
- knowledge of Nginx and Apache configuration and monitoring;
- experience with versioning systems like Git, Mercurial and SVN;
- technical knowledge and comprehension of web protocols (HTTP, TLS...);

### Required Skills

- ability to build clean, well designed, reusable code and libraries for new user-facing features.
- document technical specifications;
- thorough understanding of the importance of branding, great user experience- and user interface design, and the ability to execute in this department through code.
- optimize the application for maximum speed and scalability.
- assure that all user input is validated gracefully before submitting to back-end.
- collaborate with other team members and stakeholders and the ability to meet deadlines;
- Must be able to work in a collaborative and agile development environment;
- excellent communication skills in written and spoken English;
- excellent team work capabilities, but also be able to work independently

### What's in it for you?

You will be working in an awesome, hard working, young group of people with unique skills. We offer a competitive salary, room for personal growth and awesome team activities!
